Our Commitments

ACWA Power is a leading and innovative developer, asset owner and operator of independent power generation and desalinated water production facilities.

Our commitment to social responsibility, governance and sustainability is inherently interwoven into the fabric of our business model and guided by our vision to reliably provide water and electricity.

Our stakeholders, people and the environment are primary considerations in all we do, throughout the development, construction, operation and decommissioning phases of our facilities.

Our core values of Integrity, Rigor, Fairness, Ingenuity and Diversity are ingrained in decision making at all levels.

We champion the socio-economic development of our host communities and nations by:

- setting benchmarks and achieving world class performance standards that go beyond compliance;
- proactively engaging with our stakeholders to deliver long term shared-value creation and prosperity opportunities;
- auditing and managing our own organization and supply chain to ethical benchmarks that includes the prohibition of corrupt and fraudulent practices, child and forced labour, intimidation and discrimination;
- making certain of human rights, the safety and welfare of workers, fair employment and equal opportunity practices across our operations;
- cultivating an entrepreneurial culture that breeds professional insight to govern our risks and opportunities;
- building life-long partnerships to ensure the stewardship of our relationships and assets; and
- clearly, transparently and regularly communicating our strategies, targets and business performance.
